```python
def is_eagle(image):
    eagle_patch = ImagePatch(image)
    eagle_features = [
      "adult bald eagle",
      "adult eagle with white head",
      "... brown body and white head",
      "mature bald eagle"]
    frac = 0.0
    for q in queries:
        frac += eagle_patch.exists(q)
    frac /= len(queries)
    return 'yes' if frac >= 0.75 else 'no'
```
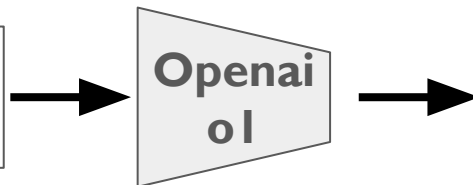

Is this an image of an adult bald eagle?
